

Take home coding assessment- Fetch Rewards

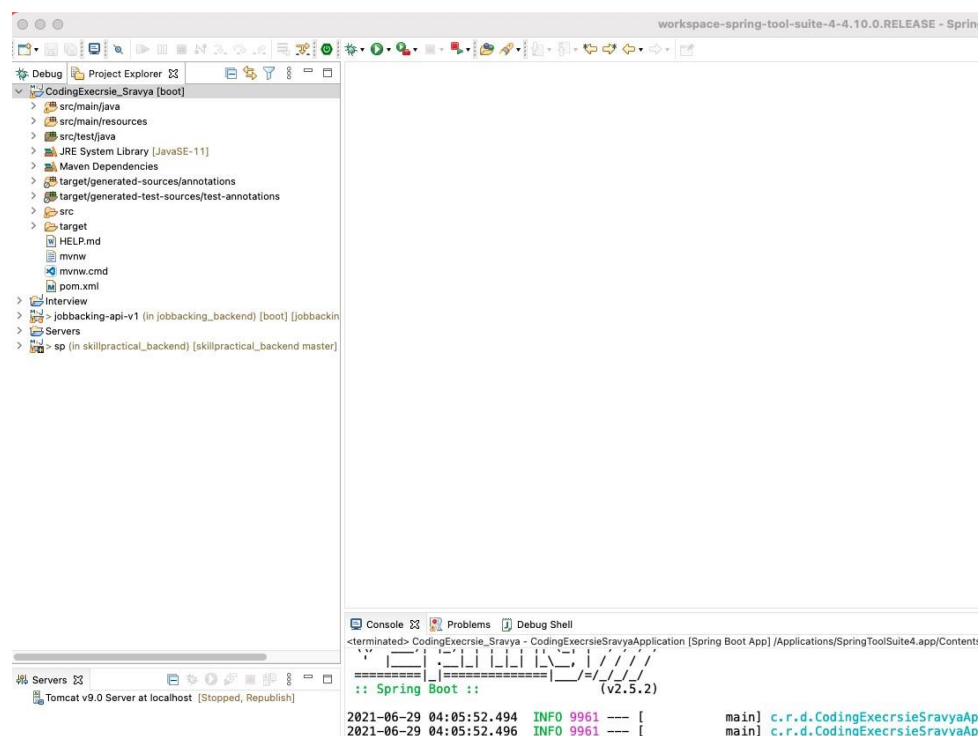

Steps To Test Implementation :

Step 1 :

Download Eclipse

Extract and Import the project as Maven Project,

Right click on Project and Run the Projects As Spring Boot application.

Step 2:

Download and Open PostMan Application, then import the postman collection provided and execute Api's one by one like below:

- First open the transaction - POST method , after the input is given we send and save it.
- Second open the spending- POST method, then points spent is given, send and save it.
- Finally open balance- GET method, then the amount of points left after spending is shown as result.
